Monte Fino and Barracuda Yacht Design unveil an all-new motor yacht series

Written by **Alexander Griffiths**

19 October 2022 | 11:30 (hdvdEc)

[Monte Fino](#) and [Barracuda Yacht Design](#) have partnered up for a brand new motor yacht series, available in three size iterations: 27.4-metre, 35-metre and a 30.5-metre model.

The first unit presented to the market is the 30.5-metre, and [Monte Fino](#) expects to release the other iterations in the near future. The series as a

whole has been designed by the Spain-based studio [Barracuda Yacht Design](#), with intensive customer research and input from the US dealer, Olson Yacht Group. The result, as [Barracuda Yacht Design](#), writes, “is a market-friendly design, where significant use of glass offers either long-windows styling, or short- rectangular window alternatives, for a more classic look and feel.”

The series promises plenty of volume and a sturdy, ocean-going hull that’s both smooth and efficient. The general arrangement is incredibly versatile, and the middle unit will be able to accommodate as many as 12 guests – making her an ideal charter vessel. Some of her standout features include a convertible aft deck dining area that can be enjoyed open or closed. As well as her extended transom that boasts a large swim platform and a long list of amenities.

The series will be built in Kha Shing, Taiwan, and offered with either an enclosed bridge on the upper deck or a raised pilot house. The team expects to start construction of the first unit during the winter of 2023.

Monte Fino and Barracuda Yacht Design will unveil further details about the series at the forthcoming Fort Lauderdale International Boat Show.
