Carreira·C1

STYLE, PERFORMANCE AND ABILITY SUMMARISE THE DESIGN FOR THE NEW CARREIRA C1 CONCEPT - INTENDED AS A LUXURIOUS RUNABOUT AND OCCASIONAL 'WEEKENDER' OR EXCLUSIVE TENDER TO A LARGE SUPERYACHT.

The **Carreira C1** project came about as a result of Identity Cars, from Galicia, Spain having asked us to come up with a sleek and stylish boat concept to complement the launch of their latest supercar prototype - the '**Identity Y2**'. The design for the boat will be announced at the same time the car is officially unveiled to the public at the prestigious 'Top Marques Monaco' show, taking place from 14th to 17th April 2011 at the Grimaldi Forum, Monaco. Onlookers will find it hard not to notice more than a passing resemblance between both car and boat. Various subtle details, such as the steering wheels and elements from the dashboard styling, for example, will be common to both. Key features include a discreet, yet purposeful looking hull, with deep V-shaped sections forward and muscular, flowing lines to the sides and rear. The hull form will provide passengers with a soft and compliant ride with reduced tendency towards slamming. Not

forgetting that each time a boat is produced, adherence to the same kind of manufacturing tolerances that apply to car manufacture, will apply in equal measure to the boat. Twin 700hp petrol engines offer speeds of up to 70knots, while two rows of three standing 'sports style' seats will hold people securely in place.Surface drive propulsion will be used and, for ease of maintenance and parts supply, the engines specification will remain largely standard. Options to 'beef-up' performance even further, however, will be available. When stationary or at slow running speeds, there is comfortable seating for six people around a fixed table, and a separate galley area & fridge unit will enable the preparation of food & chilled drinks when required. Two separate 'solarium' areas for sunbathing and relaxed conversation will keep people entertained during the day and, for those tempted to remain onboard overnight, a comfortable and well appointed interior accommodation, accessed via the starboard side of the symmetrical looking console, houses a combined shower and washroom plus generous 2.0m x 1.8m double bed. More than just a marketing exercise - all necessary calculations and compliance procedures for the **Carreira C1** have been completed, and construction can take place immediately upon first order.

Carreira·C1

ESTILO, PRESTACIONES Y POSIBILIDADES SON TRES PALABRAS BIEN ELEGIDAS PARA RESUMIR EL DISEÑO DEL NUEVO CARREIRA C1, CON INTENCIONES COMO LANCHA DE LUJO U OCASIONAL "WEEKENDER" O COMO EXCLUSIVO TENDER DE UN MEGAYATE.

Este proyecto surgió tras la consulta por parte de Identity Cars de Galicia sobre el diseño de una lancha estilizada y elegante como complemento al lanzamiento de su nuevo prototipo de Supercar **Identity Y2**. El diseño de esta lancha se hace público de manera simultánea a la presentación del coche en el prestigioso "Top Marques Monaco" que tiene lugar en el Forum Grimaldi 14-17 Abril 2011. Con un reconocible aire de familia, esta lancha y el coche comparten muchos detalles sutiles como la rueda de timón o elementos de la consola de mandos. Con unas secciones en V profunda en proa y una líneas muy potentes hacia los lados y hacia popa el diseño resulta discreto pero con mucho carácter y las formas del casco ofrecen a los pasajeros un navegar suave y seguro. Los motores de gasolina de 700Hp permiten alcanzar velocidades de hasta 70 nudos. La propulsión es mediante hélices de superficie y motores standard dentro de un rango de competición. En parado, el espacio permite acomodar a seis personas alrededor de una mesa fija con zona separada de cocina y nevera. Para aquellos más tentados por pasar la noche a bordo, se ha dispuesto un interior muy acogedor que cuenta con un aseo completo y generoso y con una cama doble de 2.0x1.8m.
