

 **VISIT [www.barracuda-yd.com](http://www.barracuda-yd.com)**

The Barracuda website [www.barracuda-yd.com](http://www.barracuda-yd.com) has undergone a significant makeover recently and we are extremely pleased with the final results. Clearly signed section headings show visitors the diversity of our work ranging from Production Designs, One-Off Designs and Project Management through to Racing Yachts and details of our past involvement with the Spanish Americas Cup syndicates. Use of as many large, visual images as possible, have helped showcase each completed design in its natural environment on the water. Written descriptions of each project highlight key aspects of the design and, in most cases, a technical pdf with expanded information can be printed off for future reference. Lastly, within the News section, visitors can view or download an archived collection of the many tributes to our work on behalf of the world's yachting press and media. These various editorial reports and features serve as independent testimonies to how well our designs have been received by the media and, more importantly, by our clients worldwide. With a noticeable increase in visitor traffic to the Barracuda website over the past 12 to 18 months, the improvements and enhancements we have made appear to have come about at just the right time. Enjoy!

News about our team

### ABOUT US

Barracuda Yacht Design was formed in 1989 and is a Naval Architecture Studio specialising in a broad spectrum of sail and motor yacht design. The company is owned by Iñigo Toledo.

### IÑIGO TOLEDO

Iñigo Toledo has overall responsibility, but on a day to day basis every project is assigned one of our Naval Architects who acts as Project Manager. This person has direct responsibility to ensure the work progresses on schedule from start through to final completion and hand over.

The standard of work is reflected in both the design and technical aspects, although we place great emphasis on cultivating a smooth and successful relationship with boatyards, project teams and, above all, the client.

### TEAM

Barracuda Yacht Design consists of 8 talented professionals, all of whom have access to the latest design technology available. So far approximately half of Barracuda's work has been for Spanish clients, with the balance of projects coming from clients in England, Germany, France, Italy and Holland and as far away as Taiwan.

### DESIGN

In most of our designs we try to adhere to the basic principals of simplicity and efficiency in terms of structure, use and cost.

Our work with the **Spanish America's Cup Challenge** in 1992 and 2007 has provided us with a distinctive vision when faced with the different challenges of design on a daily basis. To be selected and become part of these projects requires a level of skill and commitment that would be out of reach for many of our competitors.

**VISITE [www.barracuda-yd.com](http://www.barracuda-yd.com)**

La web de Barracuda, [www.barracuda-yd.com](http://www.barracuda-yd.com) ha pasado por serios trabajos de renovación y estamos encantados con los resultados. Con secciones más claras, cada visitante puede ver la diversidad de proyectos realizados en yates de producción, a la unidad, de motor o vela y project management, así como nuestro trabajo previo en Desafíos Copa América. Con grandes imágenes se muestran los proyectos terminados en su mejor medio que es el agua. Las descripciones técnicas en PDF permiten bajarse e imprimir un resumen de cada proyecto para futura referencia. Finalmente, la sección de noticias muestra la respuesta de la prensa internacional a nuestro trabajo, así como de nuestros clientes. Con un incremento muy notable de tráfico en los últimos meses, estos cambios parecen llegar en el momento justo. ¡Que lo disfruten!

### FICHA TÉCNICA

Eslora máxima: 18,9 m  
 Eslora flotación: 17,79 m  
 Manga: 5,12 m  
 Calado: 3,30 m  
 Desplazamiento: 19,90 Tm  
 Lastre: 7,0 Tm  
 Motor: 100-120 Hp  
 Agua: 650 lt  
 Gasoil: 600 lt  
 Mayor: 100 m<sup>2</sup>  
 Superficie vela ceñida: 188,1 m<sup>2</sup>  
 Astillero: Ronautica  
 Interiorista: Barracuda  
 Año: 2011

La gama Ronautica de crucero/regata se extiende con la presentación del nuevo RO 620 Custom Line.

Utilizando nuestra experiencia en el circuito Grand Prix, en el 620 hemos incorporado un casco, quilla y timón de última generación destinado a armadores entusiastas que buscan un yate muy competitivo con la opción de un crucero familiar confortable. La superficie de bañera resulta muy amplia y despejada, y la cubierta está completamente libre de obstáculos. Se puede utilizar con génova autovirante o con solape, según las necesidades de uso.
