

## ABOUT Us...

If asked to summarise the nature of requests for our design and naval architecture work over the last 10 years, we would have to say that it has been both incredibly diverse and technically challenging at the same time.

Experience and strong working relationships with many of the world's leading ship classification societies, has enabled us to push boundaries and explore otherwise unforeseen design opportunities.

We have worked on commissions as wide-ranging as the America's Cup and the Spanish State Yacht, right through to designing award-winning superyachts and small family cruisers for the production-line.

At Barracuda the rule is simple: we apply the same level of core commitment and responsibility to all our work, using the latest hull generation programmes, speed prediction tools and CFD technologies.

So for fresh thinking and an unrivalled commitment from one of the world's best known yacht design and naval architecture studios, contact Barracuda Yacht Design now.
