

## THE 'POCKET' EXPLORER – 50M

Benefiting from significant new-build and operational savings of between 30% and 40% when compared to a 60m+ yacht, Barracuda Yacht Design's concept for a 50m 'Pocket' Explorer, makes sound financial sense by offering the same kind of 'go-anywhere' capability and sense of luxury available from a larger size Explorer.

With her 9.40m beam and draft of just 2.30m (compared to say 4.00m draft for an equivalent 80m), it's not hard to imagine this full-of character yacht accessing the kind of secluded anchorage, or hard-to-reach viewing spot, that longer length, deeper-draft yachts would simply not be able to reach.

Including virtually all of today's 'must have' superyacht attributes and internal appointments, such as a private owner's deck with certified helicopter landing pad, four comfortable guest bedrooms, a lower-deck beach club and generous living spaces for a happy and contented crew. This is a true Explorer, with space enough to carry every conceivable kind of extra for truly marvellous and life-changing experiences spent onboard.
