

## @ MONACO YACHT SHOW 2018

Find us in our normal location, DG2 (Designer's Gallery 2), and sit down and relax while we show you some of our various completed designs over the last few months and talk about one or two interesting design concepts - ideas that are 100% guaranteed to get the design and naval architecture discussions and the creative juices flowing...

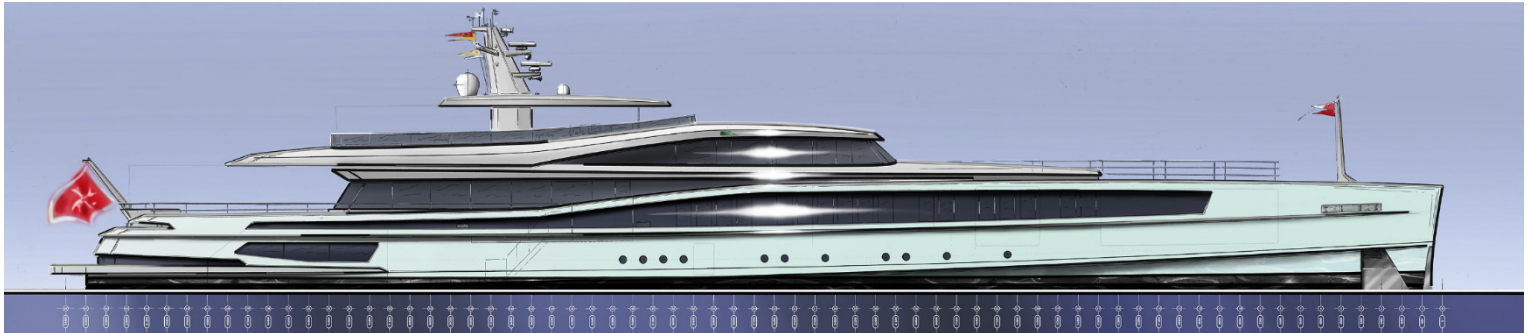

### THE 'SAILING' EXPLORER – 44M

Offering the same kind of comfort and 'go-anywhere' attributes of similar length motor yachts, our 44m Sailing Explorer concept you see here has already attracted a significant amount of client and media attention so far.

### THE 'SLEEK' FORMAT – 55M MY

Alive with features such as amazingly long 7.2m side-wings that open either side to extend the width of the lower-deck beach club, this 'Sleek 55m' low side-profile motor yacht concept is our latest interpretation for an all aluminum, fully customisable

yacht, with efficient hull, practical interior and accommodation layout and cool, decidedly unusual exterior looks to die for! Naval architects first and foremost, we are never afraid to challenge convention to bring about more efficient, more intelligent solutions to age-old problems.

Discover more by contacting Inigo Toledo to pre-arrange a mutually convenient meeting time at the Monaco Yacht Show - we sincerely look forward to meeting you there!
