

## ONE STOP SHOP

### **AT BARRACUDA YACHT DESIGN, OUR ‘ONE STOP SHOP’ APPROACH DISTINGUISHES US FROM OTHERS OUT THERE.**

From the technical to the purely aesthetical, clients come to us for many different reasons and finding practical and efficient solutions to often complex problems are the kind of challenges we like.

It's this diversity of projects that truly inspires us, and we can offer much of what you might need all under one roof.

Whether it's an architectural issue, or a hull form involving CFD, structural engineering or a classification issue of any kind. Or you might just need a fresh perspective, and a

professional second-opinion on your future interior/exterior refit plans and ideas.

Whatever your dilemma, or unique design requirement might be, we're here to help.

After all, we've been involved with the design of racing & cruising yachts, high-performance motor yachts, explorers, luxurious one-offs, production yachts and everything else in-between for the past 25 years plus, and experience counts!
