### Kingship B·120' Fly/bridge SY

---

**Award-winning Asian shipyard, Kingship, requested this 120ft fly-bridge sailing yacht design for an experienced owner looking for an orderly and 'unpretentious' deck-house cruising yacht of high interior volume.**

Representing Kingship's first serious move towards the construction of a large sailing yacht, Barracuda Yacht Design were proud to be involved.

The emphasis is for safe and relaxed cruising; with guests free to enjoy expansive and un-cluttered deck areas, including a large aft-deck lounge, wide side decks and a simplified foredeck.

From its raised position, the fly-bridge will afford guests an extra degree of privacy and the yacht's sailing controls, dining and sun-bathing areas are also located here.

The deck house itself is a bright and airy space with a sliding partition that opens and closes to enable guests to enjoy full or partial interaction with the bridge room itself. Guests sitting at the lounge or dining table will be able to enjoy wonderful all-round views, either when the yacht is at anchor, or when moored in an attractive harbour location.

Down below a largely symmetrical interior accommodation layout lends itself to more cost-effective costs for new-build and easier repair and maintenance thereafter.

Rather than using often gloomy corridors to reach each room, the 'architectural' style continues via a central lobby which provides convenient access from the aft-deck or deckhouse down to four large and luxuriously appointed guest cabins and a day head.

While purely cruising speeds are the primary intention here, a nonetheless generous 730m<sup>2</sup> sail area (main plus genoa), including a self-tacking inner jib, large genoa and gennaker matched with an easily driven hull, high-aspect balanced rudder and lifting centreboard will combine together to give still rapid progress if required.

Main Characteristics:

Length:	36.50m	Ballast:	62Tm
Waterline Length:	33.80m	Motors:	2x 700Hp
Max Beam:	8.30m	Water Capacity:	6,000 Litres
Draft:	3.80 to 6.50m	Fuel Capacity:	18,000 Litres
Displacement:	185Tm	Sail Area:	730m <sup>2</sup>
